

Tube Banners

Revolutionary Banner Display System

Exclusively from Annin & Co.

High Impact Advertising with a Full 360° View!

Tube Banners are ideally suited for Municipal Street Decorations, Special Events, Festivals, Exhibitions and Retail Promotions.

These novel banners provide exciting visual impact at affordable prices.

We can reproduce your most intricate designs in brilliant color on polyester fabric. Local businesses can sponsor tube banners and show support for their town.

Tube banners are available in a wide range of standard sizes and are easily installed on light poles with diameters from 2½ to 8½ inches. See the chart on this page for dimensions.

This display system is constructed from lightweight fabric and framed on sturdy aluminum and industrial grade plastics. Although they are strong and stable Annin's tube banners offer little resistance to strong wind and thus are designed to be attached to most street light poles.

Tube Banners are an ideal vehicle for advertising branded products in retail parking lots.

Note: Photo is for conceptual purposes only and does not represent actual application.
